

Security Shield

Advanced Cyber Security Protection

Securing data and keeping it private is one of the most complex challenges for organizations today. Despite spending millions to establish secure networks, organizations of all sizes continue to face cyber security threats. As a result, hackers gain access to protected data, financial information, and intellectual property.

That's why security isn't just a service we offer — it's part of everything we do.

Reduce your risk with cyber security peace of mind

SSI's Managed Security Services ensure optimal protection and peace of mind for your business. Protect your organization against suspicious activity, data theft, crippling attacks and security threats in real-time and across your entire IT infrastructure.

5 layers of security

Solution Perimeter Security

Firewall, IDS/IPS Solutions, spam filter, data loss prevention, MFA, vulnerability scanning
